

5.4 HAZARDS PROFILES AND VULNERABILITY ASSESSMENTS

The following sections profile and assess vulnerability for each hazard of concern. For each hazard, the profile includes: the hazard description; its location and extent; previous occurrences and losses; and the probability of future events. The vulnerability assessment for each hazard includes: an overview of vulnerability; the data and methodology used; the impacts on life, health and safety; impacts on general building stock; impacts on critical facilities; impacts on the economy; effect of climate change on vulnerability; change of vulnerability as compared to that presented in the 2011 HMP; and additional data needs and next steps.
