DESCRIPTION OF SERVICES

This program provides a structured, individualized treatment program for adults diagnosed with psychiatric and possibly co-occurring substance abuse related disorders. Services provided include groups focused on wellness and recovery, coping skills, decompensation, and relapse prevention. Within this program, the individual will create personally meaningful goals and develop an individualized recovery plan. One also receives services through a clinical specialist for coordination of services and individual sessions. A psychiatrist is available for medication management if needed and the agency provides transportation within the catchment area.
