**DESCRIPTION OF SERVICES**

Easter Seals New Jersey Outreach Services provide community outreach and case management to adult individuals and their families experiencing severe and persistent mental illness and who are at risk of hospitalization or deterioration in functioning. Case management services include: assessment, service planning, service linkage, ongoing monitoring, ongoing clinical support, and advocacy.

Easter Seals New Jersey Residential Services house adult individuals with mental health issues, providing them with housing, as well as integrated case management. Individuals with severe and persistent mental illness in need of a supervised residential environment in order to maintain themselves within their community, are referred to Easter Seals through state psychiatric hospitals and local community mental health providers.

Easter Seals NJ has behavioral health programs in five counties: Essex, Hunterdon, Somerset, Monmouth, and Warren. Our behavioral health program only works with those who have been diagnosed with a mental illness. This program does not work with the physically disabled.
