White Lake Features:

The White Lake Natural Resource Area is a 394 acre preserve in Hardwick Township owned by the County of Warren.

White Lake is a deep 69-acre spring fed water body. Beneath the clear blue water lays a chalky marl bottom composed of freshwater mollusk shells and clay.

A variety of habitats surround the lake, including fertile meadows, karst limestone exposures, sinkhole ponds, and stands of mature hemlock and hardwood forests. The shoreline is also home to various endangered or threatened plant species.

In addition, the preserve is dotted with several cultural and historical points of interest, including a lime kiln and the stone wall remnants of an ice house/marl processing facility.

This preserve offers opportunities for hiking, boating, fishing, and wildlife observation.

Please stay on the marked trails and do not disturb marked sensitive habitats.

Please remove and carry out any trash.

Hunting is only allowed by special permit.

Removal of plants, animals, wood, stone, or other natural materials is prohibited.
